Special Notes:

- 1) This is an extremely sensitive caliber, please adhere closely to indicated loads and COL guidelines.
- 2) Always begin loading at the MINIMUM "START" load and increase with 0.1grain increments
- 3) We strongly recommend using only FLATBASE bullets (especially in the Handgun)
- 4) When SP primers are to be used, a slightly lower performance can be expected
- 5) Add 10% to the above published velocities for the 10" barrel of the FN P90 PDW weapon
- 6) Excessive muzzle blast and flash is normal with this caliber
